

Qualitative Metrics

Criterion 7-Institutional Values and Best Practices

Key Indicator 7.1 Institutional Values and Social Responsibilities

7.1.5	<p>Green Campus initiatives include</p> <ol style="list-style-type: none"> 1. Restricted Entry of Automobiles 2. Use of Bicycles/Battery Powered Vehicles 3. Pedestrian friendly Pathways 4. Ban on use of Plastic 5. landscaping with trees and plants
-------	--

All of the features listed in the headings are available in SITAM, Vizianagaram. :(Option A)

1. Restricted entry of automobiles
2. Use of Bicycles/ Battery powered vehicles
3. Pedestrian Friendly pathways
4. Ban on use of Plastic
5. landscaping with trees and plants

SITAM aspires to blend into the surrounding greenery and form a synergistic bio-entity by minimizing its inadvertent effect on vicinity. All the five metrics are addressed in maintaining green campus(option A). Towards that end, several measures, as shown below are initiated:

- **Restricted Entry of Automobiles:** The institution is just abutting to the National Highway. So we encourage our faculty members and students to use the public transport for safety, security and fuel conservation. On campus, two-wheelers without helmets are not authorised, and thribles are also not permitted.
- **Use of Bicycles/Battery Powered Vehicles:** Satya Group of Educational Institutions has inaugurated **the** Tesla Innovation Center at SITAM College. SITAM took the initiative and started the start up unit in SITAM campus to produce Electric Bicycles and Autos. Electrical battery auto and e-bicycles has been invented by SITAM students. SITAM also incubated e- vehicles company “Agrayana Electric Technologies Pvt. Ltd. “ , finally started sales of its E-bicycles. The faculty members and students residing nearby are encouraged to come by bicycles. Thus we prevent the emission of carbon dioxide in the campus.
- **Pedestrians Friendly Pathways:** The campus has wide, well maintained bitumen macadam (black top) roads, well connecting the campus. We have created footpath to come to buildings from parking area. By creating one way tracks possibility of accidents is minimized.
- **Plastic free campus:** As an initiation, use of plastic bags and cups are discouraged in the campus and to promote the use of eco-friendly items such as paper bags or cloth bags instead of plastic bags and get rid of the single-use plastic bags. The students of SITAM were briefed about “Cradle to Cradle “ concept to reduce, reuse and recycle waste and the advantages of using cloth and paper bags, in place of plastic bags. Even in the canteen usage of steel plates/ leaf plates and steel cups or paper cups are mandatory.

- **Green landscaping with trees and plants:** The campus is majorly covered by greenery in the form of lawns and trees. The Institute successfully implements a Tree Plantation Program every year, which has resulted in a green and eco-friendly campus. There is a separate maintenance section to look after green environment in the campus. Many initiatives are taken for water management and preservation. This water is also used for the maintenance of greenery in the campus. Green covers in the form of lawns and by planting Variety of Plants like Ficus, Golden Bamboo, Silver Oak, Nimb, Kadamb, Spathodia etc. The campus is also planted by thick plantation near the compound wall for preventing from dust and noise pollution. Due to all green initiative our campus is pollution free, encouraging students & faculty to stay for a longer period.
