Title of the Event: INDUSTRIAL VISIT- SILERU POWER PLANT

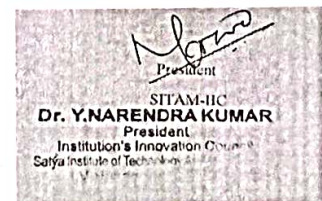

Date and Venue: NOVEMBER 10th & 11th 2023

As a part of academic activities students are taken to field visit for direct identification of problem and learn the solution methods to solve it practically. In this concern we have sent our students to SILERU Power Generation station.

We ensure this types of industrial visit will create a some practical knowledge to the students. Also understand present technology of the power generation industry in Andhra Pradesh. So this creates a mind set in every individual student in order to promote more efficient and economical methods to the industry.

Had a clear view about the power plant operation and maintenance, also seen big turbines with 95000 BHP and generators with 66.67 KVA maximum rating . It's to improve practical knowledge about hydro power plants. In the upper sileru plant , students came to know that Maximum flood discharge of the plant is 2,50,000 cusecs. And net average head is 304 Ft. and it has 4 Units of generators and each unit having capacity of 60 MW. This industrial visit was very useful as it helped to gain practical knowledge of how the power was generated by using water. Also knew that switch gear systems in the plant. I have observed various circuit breakers like minimum oil circuit breaker of 72 kV level and SF6 breaker of 36 kV to 440 kV. Students practically learned about hydro power plant working and construction. This is the best visit we had in our 4 years of engineering, acquired practically knowledge about hydro power project. In the conversation with Assistant engineers lot of things are learned. They have observed the transmission system in the plant with two stages , each with a rating of 11 kV / 220 kV.
